## OUR JOURNEY

Ravi Fans launched in 1975, is one of the leading manufacturers and marketers of Ceiling, Table, Pedestal, Cabin, wall & exhaust fans. It has established a world class manufacturing setup with state-of-the-art facilities in terms of plant, machinery and testing. The entire gamut of activities from processing of raw materials till packaging of finished products is in-house and fully automated. Years of experience and constant technological advancements have made Ravi a household name known for providing value for money fans.

**1975** - A modest beginning with table / pedestal Fans (Kaala Pankha) 2 fans /day

**1995** - Ventured into ceiling fans manufacturing

**2018** - Started a new fully automated manufacturing unit in Varanasi taking the capacity to 6000 fans / day

**2019** - Expanded our outreach to Kerela, Tamil Nadu , Bihar and West Bengal

**2020** - Started Government Supplies

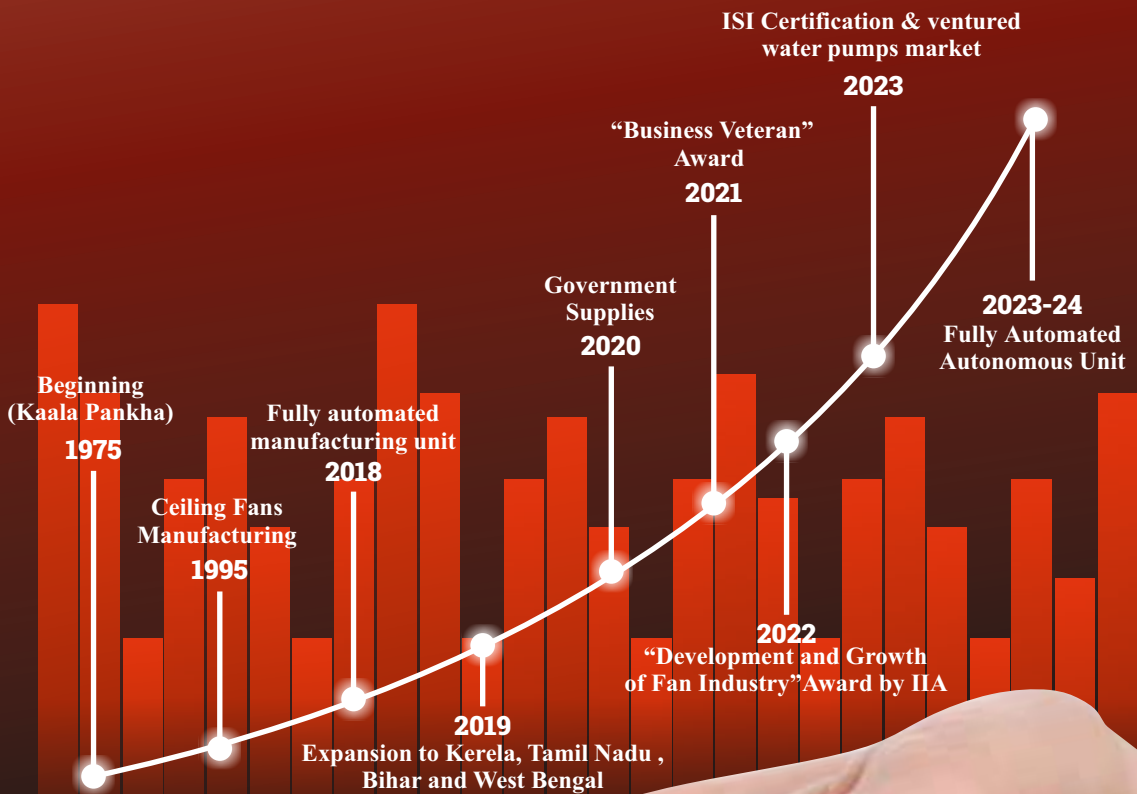

**2021** - Tally Awards under the “Business Veteran” category

**2022** - IIA Awards for “Development and Growth of Fan Industry” by Indian Industries Association

**2023** - ISI Certified and ventured into water pumps market

**2023 - 24** - Starting a fully automated autonomous unit dedicated to Ceiling fans

Both units to have a joint production capacity of 10000 fans per day

## TESTIMONIALS FROM CUSTOMERS

Since my childhood days, I love Ravi Table Fans. Even, We are living in the deep south part of Tamilnadu state, I used to come to Kashi (Varanasi) along with my grandfather. During that Kashi pilgrimage, after finishing Darshan of all varanasi temples, my grandfather used to go for shopping in Varanasi big bazaars, very particularly for purchasing Ravi Mini Size Table Fan. After returning from kashi (Varanasi) pilgrimage, my grandfather used to give as a gift, this Ravi (Mini or Tiny Table) Fan, to his friends (merchants) in our small town. Till now, in our small town, anybody can come and see this Ravi Mini Tiny Table Fans in Jewellery shops, Kirana shops and in other shops also, Very particularly, you can see this Ravi Mini or Tiny Fans in the cash counter very near to the owner of that shops. My grandfather had passed away, BUT his Ravi Mini Table Fan is still living with me. So, Since my Childhood onwards, I am a lover of Ravi Mini Table Fans. I have received Ravi Oscillating 250mm Fan safely and now working very nicely. My special thanks to packaging team because they kept that Ravi Tiny 10" Fan in double cartoon box with

One of the Best Fan in this Price Range. Completely built with metal.. You will never regret after this purchase. Just install it one by one and Enjoy... The Air it throws is Awesome... You will enjoy it. Blindly go

The product comes as a compact package with easy to assemble components. Running smoothly with optimum noise and efficient air circulation. Completely satisfying and Value for money.

I have been using this fan for about 3 months now. What a wonderful product! The air-throw is forceful and long range, with just 2 blades. I had some questions on assembly. The owner himself called me and entertained my questions, then directed his service technician to call me back. I was very impressed by the customer-centric attitude of Ravi Fans. I did quite some research before I bought this fan. It is totally made in India. Others use imported blades, or imported motor, or at least the stator/rotor is Chinese. This one is totally manufactured in our country. Friends, let us give our country's companies our support! Especially Excellent for large room. Extremely high speed fan. Service is more than the expectation. A blind

Well, I received it on 9th, Sept, 2020 (one day late). The big box it came in was quite banged up and dented which scared me regarding the safety of the parts inside but everything inside was thankfully safe, so I guess the packaging done by the seller should be applauded. The finishing on the product is very good. There were no scratches anywhere and the paint job is awesome in glossy black. All the parts are there with screws and everything is of good quality hardy materials. Although I have just set it up and not used it much, I can say that the speed of the fan is extremely high. I hope it holds up to running for long durations

Good product.. air force is super.. less noise.. whole metal body.. quality metal used.. i love my purchase,, long life usable product, no doubt i'm 29, i have been use this fan till my other generation.
